(a) PDF of wind speed (m s$^{-1}$) for WRF HR, WRF LR, and CNN.

(b) Scatter plot of WRF HR wind speed vs. WRF LR wind speed.

(c) Scatter plot of WRF HR wind speed vs. CNN wind speed.

Note: The PDF plots show the probability density function of wind speed for each model, with distinct colors for WRF HR, WRF LR, and CNN. The scatter plots compare the wind speed predictions from different models, with the axes representing different wind speed ranges for each model.
