Title: Estimation of sedimentary proxy records together with associated uncertainty

Author(s): B. Goswami et al.

MS No.: npg-2014-49

MS Type: Research Article

Dear Editors,

We thank very much both anonymous reviewers for their helpful comments and con-

structive criticism. Please find attached to this comment as a supplementary PDF the document containing our responses to all comments by the two referees. For the sake of clarity, we have italicized the referees' comments in the text of the response document.

We have also included a new figure in a new appendix of the revised manuscript, which we are appending as a supplementary figure to this comment and it is also contained with the response PDF.

We hope that our responses have covered the various issues raised by the referees.

With best regards,
on behalf of all co-authors,

Bedartha Goswami
