

Interactive comment on “An improved ARIMA model for hydrological simulations” by H. R. Wang et al.

H. R. Wang et al.

chengw@knights.ucf.edu

Received and published: 3 October 2014

We present here the revised manuscript after incorporating all the reviewers' comments and addressed all the concerns from the reviewers in order for the reviewers to see the detailed modification of the original manuscript according to the comments. Due to the significant modification, we do not present the track changes which might cause difficulty in reading the manuscript. We wish the reviewers understand this concern of ours.
