

Interactive comment on “Non-local deformation effects in shear flows” by A. V. Popova et al.

I. Zaliapin (Editor)

zal@unr.edu

Received and published: 8 July 2015

Dear Authors,

Taking into consideration the two reviews by anonymous referees, I do not recommend submitting a revised version of the manuscript at this point. If you believe you can satisfactorily address the comments by the two reviewers in a substantially revised study, I recommend submitting it as a new contribution.

Thank you for choosing NPG as a venue for your research.

Regards, Ilya Zaliapin
