

Interactive comment on “Identification of magnetic anomalies based on ground magnetic data analysis using multifractal modeling: a case study in Qoja-Kandi, East Azerbaijan Province, Iran” by E. Mansouri et al.

Anonymous Referee #2

Received and published: 28 August 2015

This paper may be of the journal interest, after a moderate revision that is necessary in order to better explain the model (with some other equations) to the reader. Specific recommendations are given in supplement file.

Please also note the supplement to this comment:
