Received and published: 4 March 2016

This is the response to the comments by Anonymous Referee #1 (Nonlin. Processes Geophys. Discuss., 2, C494–C495, 2015) on our manuscript NPGD, 2, 1–22, 2015, entitled “Toward a practical approach for ergodicity analysis”. We would like to thank Dr. Suci for reviewing our manuscript in detail as well as for the constructive comments, especially the two practical approaches, which enable us to greatly improve the quality of our manuscript. In the supplement PDF file, we present a detailed point-to-point response to each of the comments. We hope that the revisions in the manuscript and this response will be sufficient to address the reviewer’s concerns. Thanks.

Please also note the supplement to this comment:
