Received and published: 17 March 2016

Dear authors,

I am glad to inform you that two referees have reviewed your manuscript entitled “Fractal behavior of soil water storage at multiple depths” (Reference number NPG-2015-81). Both referees agree that the reported work is interesting and fits perfectly well within the scope of the Special Issue “Multifractal analysis in soil systems” to be published in Nonlinear Processes in Geophysics. However, they pointed out minor to moderate remarks on your manuscript that prevent its publication in its present form. I agree with the comments of both referees and I also reviewed your manuscript (please, see the attached file on my previous message). Therefore, you must address the issues raised by the reviewers prior to the acceptance of your manuscript in this Special Issue

C1

of Nonlinear Processes in Geophysics. Finally, I recommend a moderate revision prior to publication in this Special Issue.

Sincerely, José Manuel Mirás-Avalos
