

Interactive comment on “Intermittent heat instabilities in an air plume” by J.-L. Le Mouél et al.

Anonymous Referee #1

Received and published: 1 June 2016

Good morning.

I have revised the reply of the authors of the paper entitled "Intermittent heat instabilities in an air plume" and they have done all the corrections and I agree with their explanations and suggestions. Therefore, the article is prepared to proceed with editorial process.
