

Interactive comment on “Data assimilation for moving mesh methods with an application to ice sheet modelling” by Bertrand Bonan et al.

S. L. Cornford (Referee)

s.l.cornford@bristol.ac.uk

Received and published: 4 November 2016

The authors suggest "Given the comments of the reviewer, we would plan to augment the paper with some examples using sparse data and others using fewer ensemble members to demonstrate the power and limitations of this approach"

I think that should be sufficient to address my concerns
