

Interactive comment on “Brief communication: Electron pair donors and Earth’s energy generation” by Frederick Mayer

R. Gloaguen (Editor)

r.gloaguen@hzdr.de

Received and published: 11 June 2018

I remind the author that the reviewers were selected by the handling editor and that there is a reason for this choice.

I also remind the author that antagonizing the reviewer does not help his case. The author is entering the field of deep Earth imaging without a priori knowledge and we need experts of that precise field. These experts are not familiar with cooper pairs. Neither is the handling editor.

Rev#2 did a very difficult job and I appreciate his effort.
