

Interactive comment on “Application of Levy Processes in Modelling (Geodetic) Time Series With Mixed Spectra” by Jean-Philippe Montillet et al.

Stéphane Vannitsem (Editor)

svn@meteo.be

Received and published: 6 April 2020

Dear Dr Montillet

Thank you very much for your answers to reviewers' comments.

Both reviewers are rejecting the manuscript due to a considerable lack of clarity, logical structure and of an inappropriate description of the mathematical foundations. They both suggested to rewrite completely the manuscript. While evaluating the manuscript, I agree with both reviewers.

So my decision is to reject the paper in its present form. It will give you the oppor-

tunity to deeply revise your work and prepare a new version taking into account the constructive reviewers' comments.

NPGD

You can also withdraw your manuscript. This will be notified to the reader of your manuscript that will stay online.
