1 General

Thanks for the quick decision and the raised points. Both were clearly a fault on my side.

Comments to the Author:

Thank you for the clarifications and the swift response.

I only have two very minor remaining comments regarding the newly added sentence starting on page 5, line 121 ("While EMD is a metric measuring..."): "pdf" should probably read "pdfs" instead. Further, I would like to suggest to replace the term "proper score" by "proper metric", "proper divergence measure" or similar to further clarify the difference in application of proper scores (such as the CRPS) and proper divergence measures (such as IQD).

All changes applied as suggested.
